Supported by Strathclyde student mentors, many of whom are from widening access backgrounds themselves, pupils participate in a range of engaging and interactive educational activities, helping them to build a sense of belonging and confidence within a Higher Education setting and to maintain a focus on their post-school goals through advice and guidance on subject choices and career opportunities.

Pupils receive credit for completing activities as they progress through the different levels of the Young Strathclyde programme and will have the opportunity to engage in tasks on sustainability, entrepreneurship and health & wellbeing, as well as finding out about the different courses and careers that relate to each of Strathclyde's faculties.
